About Me

Driven and meticulous student who is very interested in technology and solving problems. Interested in learning new skills and applying academic knowledge to practical projects.

Education

Marian Engineering College, Trivandrum , B.Tech in Computer Science and Engineering	2022 – 2026
• GPA: 8.76/10	
Govt Girls HSS, Attingal , Class 12 in Computer Science	2022
• Grade : 98.5%	
Sree Gokulam Public School, Attingal , Class 10	2020
• Grade : 91%	

Experience

Intern , Richinnovations – Trivandrum	25 May 2025 – 08 June 2025
- Studied the fundamentals of Artificial Intelligence, Data Science, Machine Learning, and Deep Learning concepts through hands-on training. - Designed and implemented a deep learning model for Pneumonia Detection from Chest X-ray Images using Convolutional Neural Networks (CNNs). - Implemented data preprocessing, feature extraction, and model training using Python libraries such as NumPy, Pandas, Matplotlib, and TensorFlow.	
Intern , ICT Academy of Kerala – Trivandrum	01 July 2024 - 16 Aug 2024
- Focused on cross-platform mobile application development using Flutter and Dart. - Learned front-end development concepts including widget structure, navigation, state management, and API integration. - Designed and developed a Personal Money Management App featuring income and expense tracking with interactive user interface and data visualization. - Learned core Flutter concepts including widget hierarchy, layout design, navigation, and state management.	
Intern , Srishti Innovative Pvt. Ltd. – Trivandrum	15 May 2023 - 27 May 2023
- Focused on Python programming and foundational concepts of Data Science. - Gained hands-on experience with data handling, analysis, and visualization using libraries such as NumPy, Pandas, and Matplotlib. - Learned essential Python concepts including control structures, functions, and data manipulation for analytical tasks. - Worked on practical exercises and mini-projects involving data preprocessing and visualization of real-world datasets.	

Projects

SpeakEase 2.0 - Assistive app for fluency and reading assessment for children	github.com/SpeakEase 2.0
- An AI-driven application designed to enhance the language and reading skills of school children by bridging the gap between classroom instruction and home practice through detailed performance analysis. - Tools Used: Flutter, FastAPI, Python, Firebase	

PulmoGuard - Pneumonia Detection Website

github.com/PulmoGuard

- PulmoGuard is a Flask-based web application integrating a deep learning CNN model for pneumonia detection, featuring a responsive interface for X-ray uploads and real-time AI-driven results.
- Tools Used: HTML, CSS, Python, Flask

SpeakEase - Speech Therapy App

github.com/SpeakEase

- SpeakEase is a speech improvement app that supports individuals with stuttering through interactive, gamified levels focusing on sentence formation, storytelling, and conversational fluency to build communication confidence.
- Tools Used: Flutter, Firebase

My Money - A Personal Money Management App

github.com/MyMoney

- My Money is an intuitive money management app that helps users track income, expenses, and financial health through categorized spending, transaction history, and visual summaries like pie charts for smarter budgeting.
- Tools Used: Flutter

Skills

Languages: C, Python, Java

Tools: Figma, VS Code, Github, Google Colab

Frontend Technologies: HTML, Flutter

Backend Technologies: Firebase, FastAPI, Flask

Soft Skills: UI Designing, Problem Solving, Adaptability, Team Collaboration, Communication
